

Elder Abuse: Therapeutic Perspectives In Practice

Therapy in Practice 39

Elder Abuse
Concepts, theories and interventions
Gerald Bennett and Paul Kingston

The concept of elder abuse and neglect as a social problem continues to remain elusive. A major impediment has been the absence of research and clear definition of the problems, and a book which summarizes what is known about elder abuse has been needed for a long time. Drawing on examples from the US and the UK, this book is a major contribution to research and information currently available.

The authors define elder abuse broadly. While physical abuse is one aspect of the problem, Bennett and Kingston also study financial, emotional, sexual and psychological abuse and neglect. In addition, they cover practical concerns of recognition, intervention, prevention and related legal issues. With its multidisciplinary approach, this book is appropriate for nurses, occupational therapists, physiotherapists, social workers, geriatricians and all other health care professionals involved in elderly care.

Gerald Bennett is Consultant Geriatrician at the Royal London Hospital; Paul Kingston is a Lecturer in Nursing at the North Staffordshire College of Nursing and Midwifery.
